Clinical Innovations and Quality Improvement Projects

Patient care need for social determinant of health screening assistance Hospital introduced pre-visit screening to identify patients in need of support	2019
--	------

related to social determinants of health without identified staff to address positive screens. Conducted time study of navigators work day and determined they had ability and capacity to address positive screens. Referral system redesigned to automatically route to navigation staff.	
Office-based opioid treatment nursing documentation	2017
Reviewed nursing documentation to determine ability to follow intervention plan in absence of nurse. Identified three areas where intervention plan was not clear. Created templated note to standardize documentation of interventions.	
Evaluation of work output of Financial Services Counselors	2015
Identified that counselors were spending greater than 70% of time with patients on care coordination and outreach activities rather than financial support. Determined that counselors did not feel knowledgeable. All counselors sent to Community Health Worker certificate training program.	
Orientation revised	2012
New staff expected to be oriented at unit level. Staff come to Administration for additional support. Assess number and types of support sought. Determined a monthly centralized onboarding and orientation would be more effective.	
Health educator impact	2011
Operational budget in a deficit. Identified non-revenue generating positions. Evaluated volume, time and outcome of senior nurse educator's impact. Determined that a certified health educator would provide specific effort. Nurse transferred to another department where she can be revenue producing.	
Professional Development	
Fellow, National Institutes of Health/National Institute of Environmental Health Sciences Environmental Health Research Institute for Nurse and Clinician Scientists (EHRI-NCS) (R25ES033452, PI: Castner J).	2023
